Summary

Last year I started teaching myself how to make software apps with Stack Overflow, MDN Web Docs, googling, and a bunch more. Dropped out of my Maths degree in the second year. Working hard and coding every day, always hungry to keep learning.

Currently, I focus on improving my React knowledge. I typically use React, with some CSS framework on the frontend and Node.js on the backend.

Seeking for a Junior FullStack, Frontend, or Backend position.
